

A stronger hospitality tomorrow. In your hands.

A distinctive mobile experience for the people behind exceptional service. Learn with purpose. Apply approved knowledge. Make improvement visible.

CLIENT PRESENTATION · WORKING PRODUCT PREVIEW
Native mobile code + isolated API checks + actual app captures
Demonstration figures are illustrative; release work remains.

Knowledge □ Application □ Performance

For employees

A clear next step, focused learning and readable operational standards.

Reduce the effort of finding the right guidance during a shift.

For supervisors

Visible learning, readiness and capability gaps.

Turn a training conversation into a specific next action.

For management

Property context, team development and scoped reporting.

Connect learning activity to operational follow-through.

For ALTUS

An expandable mobile product around existing domain governance.

Support a consistent platform while respecting property identity.

Designed for hospitality. Built around the next step.

01 People first

A calm mobile interface with clear reading, useful touch targets and focused actions.

02 Trusted knowledge

Approved SOPs, version metadata and source-led operational guidance.

03 Evidence of progress

Learning and capability are connected without treating course completion as proof of readiness.

One experience. Two reading directions.

English and Arabic interface catalogues. Arabic typography and mirrored navigation. Switch language without signing out. Localized dates and numbers.

Global coverage is described precisely:
186 selectable language entries, including all ISO 639-1 languages and platform additions.
250 country/region entries; every ISO 3166-1 country is present.
Other languages currently display an explicit English fallback. Country coverage is not a claim of translation into every language or dialect.

A reviewable product. A clear release path.

BUILT AND VERIFIED HERE

Native React Native/Expo code and 110 registered routes.
English/Arabic browser captures and responsive checks.
Local demonstration journeys and persistence.
Additive API: identity, courses, plans, lessons, server-graded assessments, SOPs, acknowledgment, search, governed AI with sources, competency, readiness, actions, certificates, people, gaps, KPIs, notifications and assignments.
20 isolated HTTP authorization and assessment checks.

REQUIRED BEFORE A PRODUCTION SALE / RELEASE

Deploy the matching password-login backend update to the public website.
Native iOS and Android device validation.
Device validation of media playback and all assessment types; private media delivery.
Encrypted account-bound offline media and idempotent progress synchronization.
Push token registration and delivery.
Live support tickets, discussions, event attendance, property-brand publishing and content approval actions.
Native administration beyond the current secure web-console links.
Provider configuration and store release acceptance.

Direct email/password login, device/MFA verification and role-based screens are implemented and tested against the isolated backend. The public server update and native device acceptance remain. Demonstration figures are illustrative; additional languages currently use English fallback.

033 / ASSESSMENT

Put your knowledge to work.

The screenshot shows the English assessment interface. At the top, there are navigation icons (back, home, forward) and a progress bar. The main heading is "Put your knowledge to work." Below it, the question is: "A guest is upset about a delayed room. What should you do first?" There are three radio button options: "Listen and acknowledge the concern", "Explain that the hotel is busy", and "Promise a free stay". A "Next" button is at the bottom. The bottom navigation bar includes icons for Home, Learn, Knowledge, Assistant, Team, and Profile.

Scenario and knowledge questions with pass rules and clear feedback.

034 / ASSESSMENT

Your assessment result

The screenshot shows the Arabic assessment result interface. At the top, there are navigation icons (back, home, forward) and a progress bar. The main heading is "نتيجة تقييمك" (Your assessment result). Below it, a large green "100%" is displayed with the text "أحسنت. حان وقت التطبيق." (Well done. Put it into practice.). There are three sections of feedback: "ضيف مستاء من تأخر تجهيز الغرفة. ماذا تفعل أولاً؟" (Guest is upset about a delayed room. What should you do first?), "يمكنك الوعد بتعويض خارج صلاحياتك. صغ أم خطأ؟" (You can promise compensation outside your authority. True or false?), and "بعد معالجة المشكلة، ما الذي يكمل استعادة الرضا؟" (After handling the problem, what completes the recovery of satisfaction?). The bottom navigation bar includes icons for Home, Learn, Knowledge, Assistant, Team, and Profile.

Understand the score, explanations and permitted next step.

Where to focus next

The screenshot shows a mobile application interface for management. The top bar includes navigation icons (back, home, search, forward) and a status bar. Below the bar, there are two main sections: 'MANAGEMENT' and 'DEMONSTRATION'. The 'MANAGEMENT' section is titled 'Where to focus next' and contains a search bar with the placeholder 'Find your next answer...'. Below the search bar, there are two rows of items, each with a title, a subtitle, and a right arrow. The first row is 'Practice service recovery' with the subtitle 'High priority - Practical review required'. The second row is 'Communication confidence' with the subtitle 'Needs attention'. The 'DEMONSTRATION' section is titled 'أين نركز تالياً' and contains a search bar with the placeholder 'ابحث عن إجابتك التالية...'. Below the search bar, there are two rows of items, each with a title, a subtitle, and a right arrow. The first row is 'التدريب على استعادة رضا الضيف' with the subtitle 'أولوية مرتفعة - مراجعة عملية مطلوبة'. The second row is 'ثقة في التواصل' with the subtitle 'يحتاج إلى متابعة'. At the bottom, there are two tabs: 'ENGLISH' and 'ARABIC / RTL'.

Prioritize open competency gaps.

084 / MANAGEMENT

Practical assessment queue

The screenshot shows a mobile application interface for management. The top bar includes navigation icons (back, home, search, forward) and a status bar. Below the bar, there are two main sections: 'MANAGEMENT' and 'DEMONSTRATION'. The 'MANAGEMENT' section is titled 'Practical assessment queue' and contains a search bar with the placeholder 'Find your next answer...'. Below the search bar, there are three rows of items, each with a name, a subtitle, and a right arrow. The first row is 'Ahmed Al Mansouri' with the subtitle 'Front office - Guest service - In progress'. The second row is 'Sara Mohammed' with the subtitle 'Housekeeping - Floor supervisor - Ready'. The third row is 'Omar Khalid' with the subtitle 'Food & beverage - Service - Needs attention'. The 'DEMONSTRATION' section is titled 'قائمة التقييم العملي' and contains a search bar with the placeholder 'ابحث عن إجابتك التالية...'. Below the search bar, there are three rows of items, each with a name, a subtitle, and a right arrow. The first row is 'أحمد المنصوري' with the subtitle 'المكاتب الأمامية - خدمة الضيوف - قيد التقدم'. The second row is 'سارة محمد' with the subtitle 'التنظيف - مشرفة الطابق - جاهز'. The third row is 'عمر خالد' with the subtitle 'الأكلية والمشروبات - الخدمة - يحتاج إلى متابعة'. At the bottom, there are two tabs: 'ENGLISH' and 'ARABIC / RTL'.

Global by architecture. Honest about coverage.

The selector includes all ISO 639-1 language codes plus Filipino and Central Kurdish from the platform. That standard covers widely used languages; it does not enumerate every living language, dialect or script variant.

English and Arabic UI translations are implemented. Additional language packs require translation, review, content availability and script/device QA.

All 249 ISO 3166-1 country/territory codes are present, with the platform's additional region entry. Countries carry dialing code, currency and a default time zone.

A country does not map to one language. Property time zones and language preference are independent.

The complete machine-readable registries accompany this package as languages.json and countries.json. No registered country or selectable language was omitted from the delivered catalog.

Start with one property. Grow with evidence.

1. Validate the foundation

Confirm the production API, identity policy, role matrix and source ownership. Test native devices and required integrations.

2. Pilot with a real team

Launch one department with approved content, a supervisor and a defined support owner. Track access, completion, understanding and practical follow-through.

3. Review operational value

Compare agreed evidence before and after the pilot. Refine the learning plan and the property's standards.

4. Expand deliberately

Add departments, properties and reviewed language packs with a consistent governance process.

A commercial offer should distinguish the delivered preview, the implementation scope, provider costs and final native release acceptance. No invented ROI or accreditation claim is included.
